**Smartphone use could be changing shape of our skull**

*CIENTISTAS* *DISORDER* *FORMA*  
Scientists say that smartphones are changing the shape of people's skulls. Some people are spending so long looking at smartphones that a small bony bump is appearing above their neck. Doctors say the bump is large enough to feel by pressing the bottom of the skull, just above the neck. Dr David Shahar, a health scientist at the University of The Sunshine Coast in Australia, spoke to the BBC about the discovery. He said: "I have been a clinician for 20 years, and only in the last decade, increasingly, I have been discovering that my patients have this growth on the skull." The bump is becoming more frequent among 18 to 30-year-olds who spend many hours a day hunched over their smartphone.

NECK → PESCOÇO

- MENTE

COM IDADE

A study led by Dr Shahar looked at the smartphone use of 1,200 people aged 18 to 86. Shahar said 18 to 30-year-olds were more likely to have the skull bumps than older generations. He said the bumps will probably be more common as we spend longer bending our necks while looking at their phones. Doctors say the bump could come from constantly bending the neck at unnatural angles to look at digital devices. Our head weighs about 4.5 kilograms and bending our head at the same angle for a long time can strain the neck. Doctors are calling this strain "text neck". They say the skull bump rarely causes health issues. They advised people to change their posture if their neck becomes sore.

## QUESTÃO 1

LARGE ENOUGH

ABOVE

DE ACORDO COM O TEXTO, JULGUE EM VERDADEIRO OU FALSO.

- # F F F V V V F V #
- 1) A small bony bump is appearing on the neck of smartphone users. F
  - 2) The bump is too small to be felt. → TO FEEL (SENTIR)
  - 3) A clinician said he has had a skull bump for 20 years. DÉCADA ⇒ 10 YEARS
  - 4) The skull bump is most common in people aged between 18-30.
  - 5) Researchers looked at the smartphone use of those aged from 18 to 86.
  - 6) The bumps could be caused by bending our heads at unnatural angles.
  - 7) Our head weighs about 5.4 kilograms.
  - 8) Doctors advised people to change their posture if they have a sore neck.

⊗ RESEARCHER → PESQUISADOR

## QUESTÃO 2

## RESPONDA DE ACORDO COM O TEXTO

Quem falou que celulares estão mudando a forma do crânio?

1) Who said smartphones are changing the shape of people's skulls?

SCIENTISTS

O que os doutores falaram que a alteração com o tamanho

2) What did doctors say the bump is large enough to do?

TO FEEL

SUFICIENTE É CAPAZ?

Qual o veículo de comunicação um clínico falou a descoberta?

3) What news agency did a clinician talk to about the discovery?

THE BBC

Quanto tempo o clínico tem de trabalho?

4) How long has the clinician been doing his job?

FOR 20 YEARS

### 001 | FUVEST

Assinale a alternativa que preenche corretamente as lacunas:  
Boys have big \_\_\_\_\_ and girls have small \_\_\_\_\_.

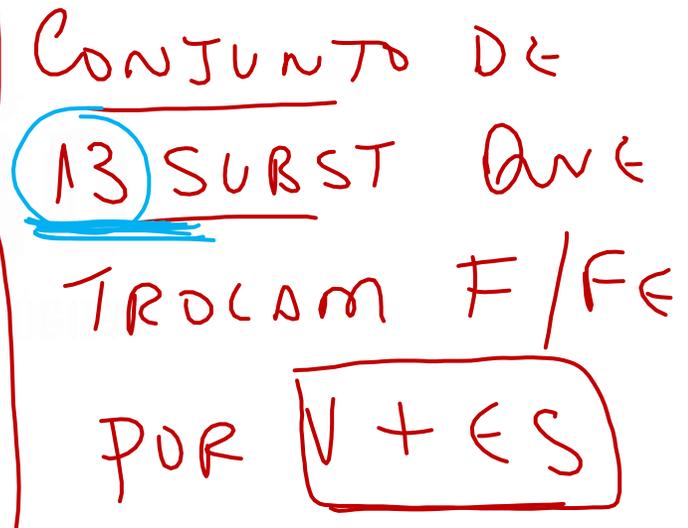

- a) ~~foots~~ – ones
- b) feet – ones
- c) feet – one
- d) ~~feets~~ – ones
- e) ~~foot~~ – one

### 002 | CESGRANRIO

KNIVES is the plural of KNIFE. Which of the words below does not form its plural in the same way?

- a) Wife. WIVES
- b) Life. LIVES
- c) Leaf. LEAVES
- d) Chief. CHIEFS
- e) Half. HALVES

## PLURAL NO VESTIBULAR

### 003 | CESGRANRIO

The word that **DOESN'T** have an **irregular** plural form like

**tooth – teeth** is:

a) ox. **OXEN**

b) foot. **FEET**

c) cloth. **CLOTHES**

d) goose. **GEESE**

e) mouse. **MICE**

### 004 | FATEC

Observe a frase: "Did hundreds of Japanese **KIDS** suffer a TV-induced epileptic attack last week". Indique a alternativa em

que todas as palavras têm a mesma forma de plural de **KIDS**:

a) attack – mouse

b) episode – Japanese

c) **cartoon – trigger**

d) show – child

e) explosion – Japanese
